

GA-ASI Supplier Barcode Packaging Specification

1. GA-ASI Quality Clause

Q-8: Barcoded Packaging Specification:

The supplier shall provide barcoded product identification and associated documentation in compliance with **ASI-12014** (<http://www.ga-asi.com/supplier-barcode-packaging-specification>) for all physical deliverables. The total number of labels is based on the number of purchase order line items, number of serialized parts, and the number of packages for the specific purchase order line item. The labels shall be interpretable/readable by a barcode scanner and placed in a manner to prevent folds, creases, or damage.

2. Barcoded Specification Language -- (parts with no material master)

Barcoded Packaging Specification: The supplier shall provide barcoded product identification and associated documentation in compliance with **ASI-12014** (<http://www.ga-asi.com/supplier-barcode-packaging-specification>) for all physical deliverables. The total number of labels is based on the number of purchase order line items and the number of packages for the specific purchase order line item. The labels shall be interpretable/readable by a barcode scanner and placed in a manner to prevent folds, creases, or damage.
